ARMY Declass/Release Instructions On File

Gentlemen:

A perusal of a recent edition of Selected US Government Publications, issued by the Superintendent of Documents, revealed a series of maps published by your agency entitled "General Reference Maps of Foreign Countries."

This US Army Reserve Medical General Officer Command Headquarters will shortly commence its annual tour of Active Duty at a summer encampment installation. This year, as like last year, we shall be engaged in what is termed by the Department of the Army a LOGEX (i.e., logistical exercise).

This year's LOGEX, whose scenario is written by the US Army, will take place in the BENELUX nations, where our "headquarters" as a Medical Command of a Field Army will be located.

Towards this end, would it be feasible for your agency to provide this organization with single [1] copies of the aforementioned C.I.A. reference maps for the nations of Belgium, Luxembourg and The Netherlands.

Many thanks in advance for any assistance rendered to this USAR unit.

Sincerely yours,

ARNOLD ALBERT
Captain, MSC, USAR
Information Officer
